

SLC Mode Solution

Reinforce the backbone of 5G applications

Transcend's embedded SLC Mode solutions provide extended P/E cycles up to 100K times and prolonged product lifespan, ideal for 24/7 efficiency and intensive workloads. These solutions are a cost-effective choice for network deployments, delivering reliability and performance.

Unparalleled Durability

Offering 30x greater P/E cycles for efficient 24/7 data transfer.

Guaranteed Performance

Achieve the performance of SLC NAND flash at a substantially lower cost.

Cost Efficiency

Affordable cost for large-scale embedded deployments.
